Post-Activity
Assessing medical competency in the workplace

This activity is intended to reinforce your learning from the session, ensuring you can put the skills gained into practice in your everyday setting.

Preparation

Please read;

Activity

Reflect on how you can use work-based assessment tools to improve your supervision skills and put them to use in your day-to-day practice as a supervisor.

Following this, ask the junior doctor whether they found the WBA useful to their continuing development and if they have any feedback for you.

Complete the following questions:

Are WBAs fair, valid and reliable?

Did your perception of WBAs change after using them as an assessor?

How could learning and assessment in the workplace be augmented through the use of WBAs?

Will your supervision practice change as a result of learning about WBAs?
